Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The "maximum dimension" is not defined in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oka et al (4,813,677). Regarding claim 1, Oka discloses a golf ball comprising a plurality of dimples. The dimples include an edge and an outer region (see fig 12). Applicant further claims the outer region has a width (W) from 0.03 mm to 0.20 mm. Oka does not disclose the range. However, since applicant has not claimed a particular location of the edge the range is encompassed by Oka. In other words, the edge may be any point on the dimple. Regarding claim 2, according to the specification the maximum

dimension is the diameter of the dimple or 2.2 to 6 mm. Oka discloses dimple diameters from 2.9 to 4.3 mm. The W/d ratio is satisfied since the diameters fall within applicant's range as well as the width (W). Regarding claims 3 and 4, the angle formed by the outer region and the maximum dimension line (T) is also satisfied. Applicant discloses a depth (T) for the dimples from 0.1-0.6 mm and Oka discloses a dimple depth from 0.18 to 0.27 mm. One of ordinary skill in the art would have modified the ranges of Oka for enhanced flight properties.
